Ex F)
Ex C
Ex B
end

entering an address of the service provider and the quality of service parameters of the connection into a data structure pertaining to the service request by the network element; and communicating the quality of service parameters for the connection setup to the communication server.

7. (New) The method according to claim 6, wherein when a new service is setup in the communications network, values of the quality of service parameters are communicated to the network element and stored therein.

In the Abstract:

Please replace the abstract with the new abstract attached herewith.

In the Drawings:

Please amend the drawings according to the attached Request for Approval of Drawing Corrections filed herewith.
